The screenshot shows the WordPress editor interface. On the left is a dark sidebar with navigation options: Dashboard, Posts, Media, Pages (selected), All Pages, Add New, Comments, Appearance, Plugins (3), Users, Tools, Settings, and Collapse menu. The main editor area has a top bar with 'Add Media' and 'Visual'/'Text' tabs. Below the tabs is a toolbar with icons for bold, italic, link, quote, delete, insert, image, list, code, and close tags. The main content area shows the following HTML code:

```
When I started working, I wrote anytime the hourglass rotated on the screen. So, I found ways to write at work. If they needed a document, a written explanation, or anything that involved writing, I would research the document type on the internet or MS Word document template database. Either way, I would figure out how to properly create the document, and I would write it. Then I would have someone review it.
```

Regardless of my job or current position, my career is that of a writer. The documents that I produce are of assistance to the department or other employees. The documents include step-by-step job manuals, process manuals, software testing steps and results, and job descriptions. I am and always have been compelled to help others with my writing abilities. Writing is my superpower.

Potential Errors

1. If you don't change the Style, the magazine won't be consistent with the other documents on the page.
2. If you don't change the Size, the magazines on the WordPress page will push the other magazines to another line and will not feature all documents equally.
3. If you don't delete the hyperlink code, an added hyperlinked title will appear on the page. It cannot be manipulated.
